

Gregg Roby, Mayor

As part of Project Clear, the Metropolitan St. Louis Sewer District (MSD) will be constructing a project in the city of Crestwood at 8645 Pardee Lane, the current site of the Crestwood Public Works facility. The project is the Gravois Trunk Sanitary Storage Facility. Information on the project is included in the fact sheet from MSD. The goals of the project is to eliminate an overflow into Gravois Creek that is located behind Pardee Lane which is activated during heavy rains, reduce the number of residents that have water backups in the area, improve water quality in Gravois Creek, and reduce the overloading of downstream sewers. The anticipated construction start date is early 2018. If there are any questions about the project, please call Steve Roberts with MSD at (314)768-6310.

The Crestwood Public Works facility will be relocated to 9353-9375 Watson Industrial Drive. With an anticipated move in date in early 2018.
