

Department of Public Works

2017 Selective Slab Replacement Project

As part of the City of Crestwood's street maintenance program, the following streets were selected to have selective slab replacements performed in 2017:

Barberton Drive, Winterberry Drive, Ulysses Court, Banyon Tree Court, Sturdy Drive, Silvercrest Drive, and Grantwood Oaks Court.

The work is being performed by J.M. Marschuetz Construction Company. The work started on Friday, June 2, 2017 on Silvercrest Drive. Weather permitting, this project is expected to be completed by the end of July.

Letters have been delivered to all residents that are adjacent to the designated concrete work. Before work starts on your street, no parking signs will be placed on one side of the street. That side will be broken up first, prepared with rock, steel rods, forms, and the concrete will then be poured. After a waiting period of seven days (while the concrete cures) that side of the street will be reopened and the work will begin on the other side. There will be no access to driveways on the side the work is being performed during the preparation and the waiting period. However, this is unavoidable.

Thank you in advance for your patience and cooperation during construction. If you have any questions or concerns, please contact the Superintendent of Maintenance, Brian Hibdon at (314) 729-4730. We hope you will be pleased with the end result.
